

# *Oregon Turf's Sod Ordering Check List*

**Sod is perishable, please do the following to help insure a great lawn.**

- **Prepare the ground prior to the sods arrival including installing any under ground irrigation.**

Till and level soil adding any soil amenities needed before you order. If you plan on installing a under ground irrigation system now is the time.

- **Measure and calculate the new lawn area into square feet. ([Length X Width etc.](#)).**

\*Total\_\_\_\_\_sq./ft.

- **Have a watering system ready to go.**

Protect your investment. Your new lawn will need water immediately following installation.

- **Starter Fertilizer is recommended either before or after installation.**

You can find Starter Fertilizer at your local garden center or we can deliver it with your sod. Don't forget the fertilizer spreader.

- **If your picking up your sod, line up a vehicle and/or trailer prior to ordering.**

A half ton, full-sized pickup truck can usually hold 500 sqft.

There is no minimum to purchase on pick-up orders at the farm.

500 sqft minimum on deliveries. Orders 1000 sqft or over are delivered free.

- **Call: 1-800-426-1335**

(Please note that orders picked up at the farm may need a 24 hour advance notice and deliveries many require additional time.)
